# High Speed Automatic Strapping Machines

The FRP-1200 is designed to deliver enhanced usability, safety, and operational efficiency, making it ideal for high-performance packaging environments.

## Features

- Built-in strap dispenser for a clean look
- Rotating control panel for easy access
- Precise electronic tension control
- Auto strap threading for quick reloads
- Loop ejection to prevent misfeeds
- Adjustable table height (832–962 mm )
- Foot bar switch for hands-free operation
- Quick access points for easy service
- "No Package, No Tension" system – Prevents strap waste and machine wear when no package is present.
- 2nd Strap Refeed – Reduces misfeeds
- Auto Last Strap Ejection – Prevents end-of-coil jams
