

# HAJ13 SERIES

## SUPER JUMBO COIL DISPENSER

### Key Features

The FROMM HAJ13 is a PLC-controlled horizontal automated jumbo dispenser for high-volume industrial strapping operations. It holds up to 4 super-jumbo coils of PET or steel strap on a motorized turntable loaded by forklift. No chain hoist. No manual lifting.

At 180,000 ft per pallet load, the HAJ13 reduces changeovers by 75% and machine stops by 42x, delivering measurable labour savings and increased throughput for Canadian operations.

- ✓ Horizontal loading by forklift – no lifting, no hoist
- ✓ Carries 4 coils × 660 lbs (180,000 ft total) per load
- ✓ PLC-controlled turntable with intelligent brake system
- ✓ Alarms signal when strap needs changing
- ✓ Left or right hand loading – configurable
- ✓ Compatible with steel and PET strapping
- ✓ Stand-alone or integrated into existing systems

Turntable Rotation Speed	6–26 RPM
Total Machine Weight	600 lbs (272 kg)
Max Coil Capacity	660 lbs (300 kg) per load
Coil Configuration	Up to 4 × Super Jumbo coils (horizontal)
Installed Power	1.1 kW
Power Supply	400V–480V
Strapping Capacity (per load)	~180,000 ft (55,000 m) PET
Strap Compatibility	Steel and PET plastic strap
Loading Method	Horizontal by forklift (pallet stays on dispenser)
Control System	PLC with intelligent brake & de-coil control
Alarm System	End-of-strap detection & coil-change alert
Loading Side	Left or right (field-convertible)
Integration	Stand-alone or machine cabinet managed
Options	Safety fences, pit-frame, double turning table
